

Maintenance Engineer

Centrum Pile are seeking a Maintenance Engineer, located at our pre-cast concrete production facility in Newark, the UK's leading and most advanced manufacturer of continuously reinforced, driven precast concrete piles.

The ideal candidate will have a good understanding of hydraulic, pneumatic and electrical systems and their corresponding drawings. Previous experience within the concrete industry would be advantageous. The candidate will be working as part of the maintenance team over a 3- shifts rota. Good communication skills and attention to detail when completing paperwork is essential.

Main Duties and Responsibilities:

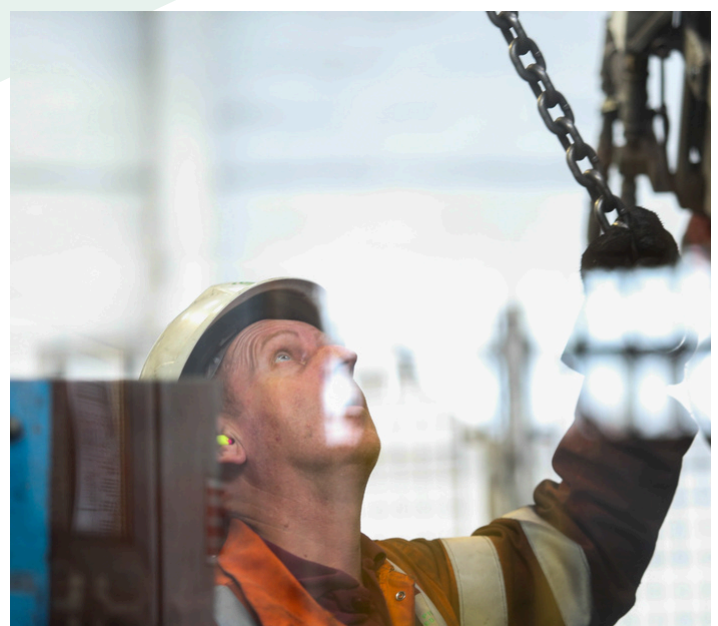

- To carry out all activities within the area of this role responsibly and in accordance with current Quality, Environmental and Health & Safety.
- Respond to breakdowns as required, diagnose and repair.
- Actively seek to reduce reactive maintenance where possible by analysing root causes and assisting with improvements to prevent reoccurrences.
- To recognise and ensure necessary maintenance of all equipment involved in production and scheduled maintenance at designated intervals via the MaintMaster system. Complete the maintenance tasks as identified from the PPM schedule via the MaintMaster system.
- Liaise with the internal functions to ensure successful introduction and implementation of new / purchased production equipment. Control the stock levels of the required maintenance spares and parts by working with the Maintenance Manager.
- Product and process development through improvement of H&S, quality and efficiencies of the product, floor layout, process flow, methods, tooling, logistics and operational disciplines by working productively with both the maintenance and production teams.
- Work as part of the maintenance team to ensure plant is running as up to date and efficient as possible, innovating and improving around our entire site. Above all working safely for themselves and others.
- To carry out such other duties as reasonably directed by the Factory / Maintenance Manager.

Person Specification:

- Understanding of Health and Safety
- Friendly and approachable while professional.
- High level of accuracy and attention to detail.
- Will be organised and calm under pressure.
- Proactive, positive, and flexible to the needs of the business and the role.
- Ability to prioritise own work and work of others to meet deadlines and achieve targets in a fast-paced dynamic environment.
- Demonstrates a solid one team approach and "can do" attitude.

Qualifications and Experience:

- At least 1 years' experience in an industrial maintenance environment.
- A City & Guilds engineering qualification or equivalent.
